Summarize Adatum Corporation's projects

Adatum Corp Innovative Main Campus project  
has critical issue

Other nearby plumbers suitable for this  
project

Bothell Plumbing

Change vendor, add to project note

Done. Project note created.

## Use **Dataverse MCP server**

- Agent instruction built using evals first (question, answer, assertion, expected behaviors) with context
- No Knowledge, no Actions – just agent instruction

# Build your agent more easily

Think of your users jobs-to-be-done (JTBD) to understand your agent use cases, with examples.

Use Copilot (or your preferred AI assistant) to create and help iterate on your agent instructions

Test and create/run evals in **Copilot Studio** and publish to **M365 Copilot**

## Test case details

Show activity map

### 75/100 - Mostly same meaning

The agent answer gives all the important details about the plumbing problem at AC Innovative Main Campus, including who is handling it and when it should be fixed. It also adds useful extra information like contact details, which helps understand the issue better. There are no mistakes or missing parts, so the answer matches well with what was expected.

## Microsoft channels

Microsoft 365 Copilot

# Dataverse MCP Server

GA

Unlock data operation tools and agentic-tools for your agents

## 1. Enhanced governance framework

Enable or disable Microsoft clients (e.g., Copilot Studio, VSCode GitHub Copilot) and non-Microsoft clients (Claude, etc), accessing MCP Server

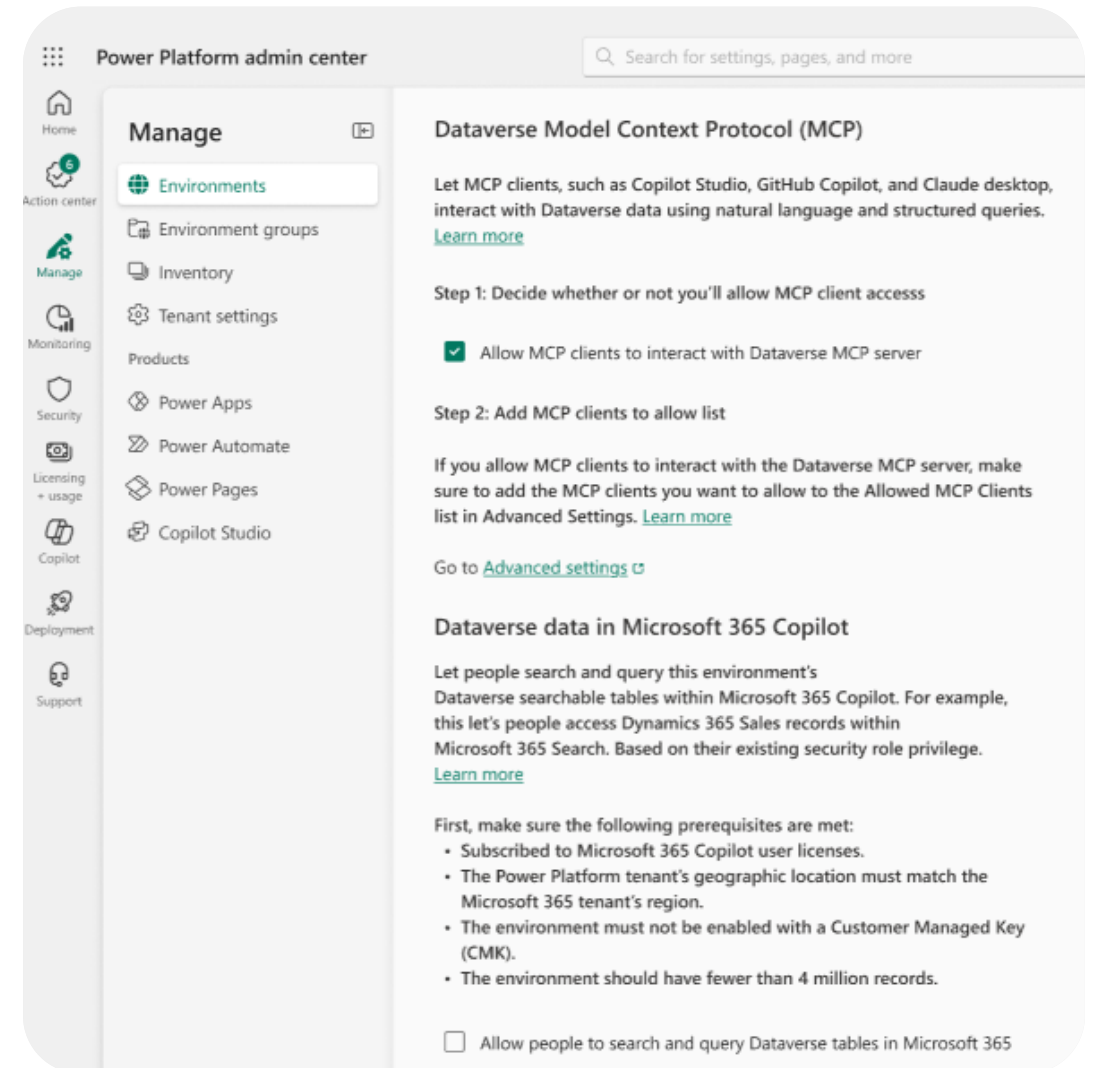

## 2. More advanced MCP tools in data discovery and management functions

*CreateTable, UpdateTable, DeleteTable, DeleteRecord, SearchTool, and FetchTool.*

## 3. Support for Remote MCP in VSCode

## 4. Enable/disable tools in Copilot Studio

## M365 Copilot Chat in Power Apps

Preview

Summarize Adatum Corporation's projects

Adatum Corp Innovative Main Campus project has critical issue

*Continues in M365 Copilot App*

## M365 Copilot App

Guidance on vendor selection?

Vendor Proximity

Other plumbers more suitable for AC Innovative Campus?

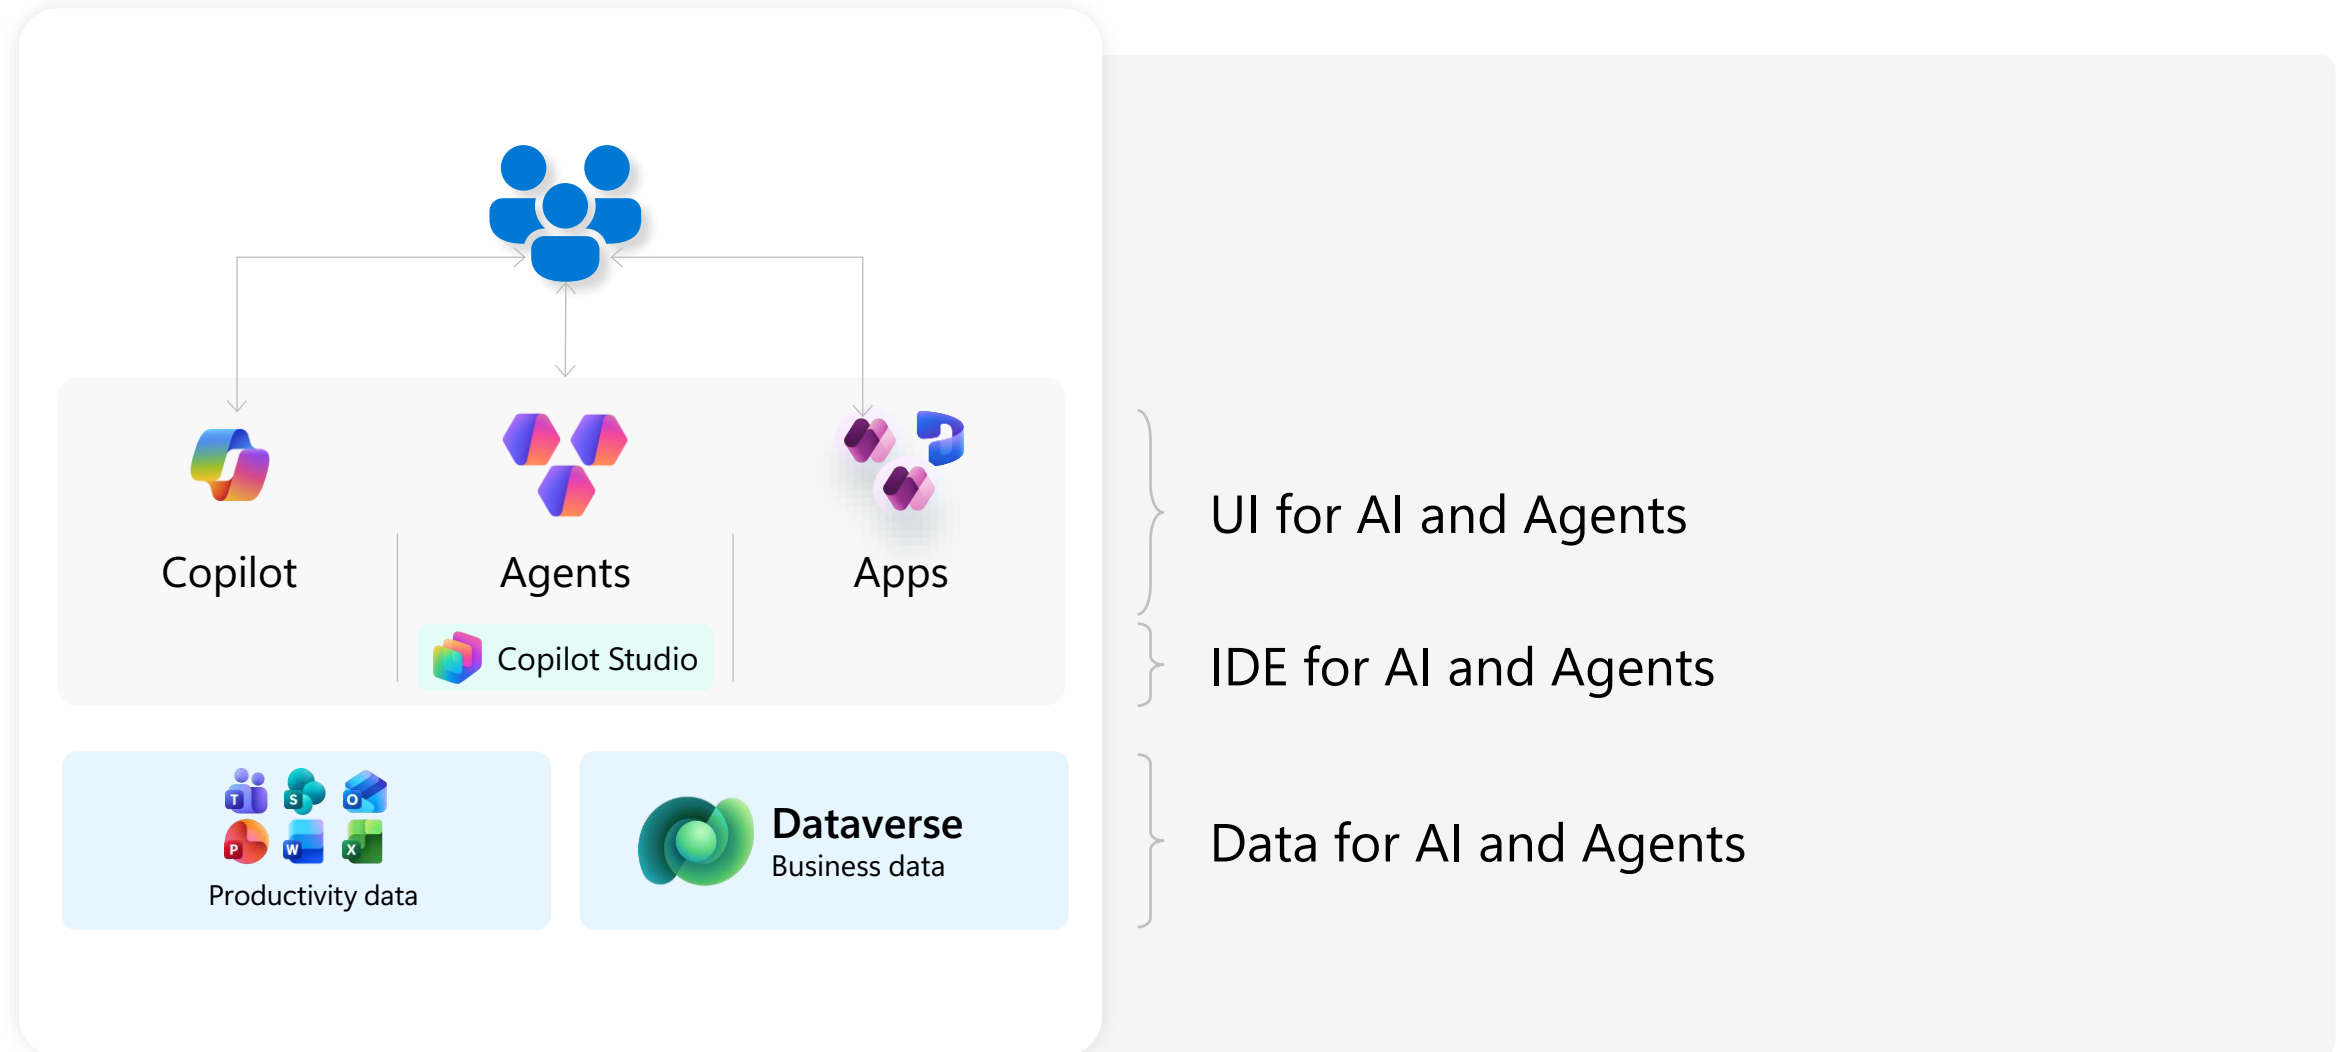

Bothell Plumbing

Change vendor, add to project note

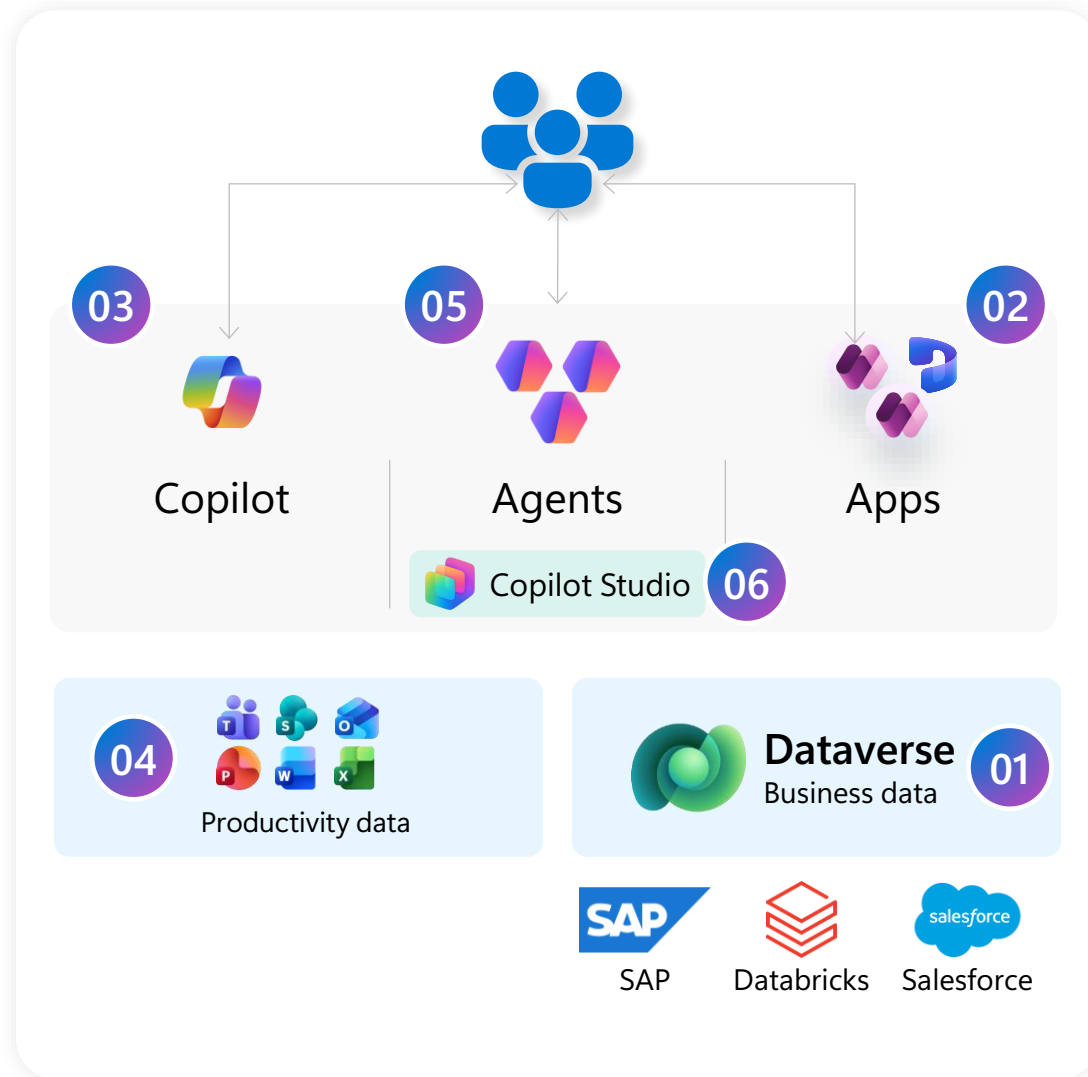

Done. System of Records updated

# Accelerating pattern: Apps + AI

# Accelerating pattern: Apps + AI

- 01 Dataverse continues to be the intelligent data platform for your apps and agents
- 02 Power Apps now supports M365 Copilot Chat (connected to Dataverse directly – aka Work IQ)
- 03 From Power Apps, continue to M365 Copilot App with session context ...
- 04 .. ask insights from Productivity data
- 05 .. Interact with a purpose-built agent that can reason with and act on Dataverse data via Dataverse MCP server
- 06 ... built using Copilot Studio
