Executives are putting
agentic AI at the core of
business transformation.

1B+

Active agents forecast by 2029,
executing 217B actions a day

Great employees know
Not just **where the data is...**
but **...what it is**

You **empower your agents** with
the same knowledge and context

Business understanding doesn't live in one place.

Your data and analytics

What's happening in the business

How people work

Collaboration and the flow of work

Your business applications

Where processes and
relationships live

+

Work IQ

HOW PEOPLE WORK

Helps agents understand the world of work
and how your business operates

The shift to remember

From finding an insight, to understanding its business meaning, to helping move the work forward.

One dispute today touches many systems and hands

ZAVA CAPITAL DISPUTE DEPARTMENT TODAY

Every dispute today: ~50 to 65 manual steps, across apps, reports, and people

Achieve more to scale with Agents and automation

THE GOAL

Scale & Agentify

More disputes handled, faster,
by the same team

Decide

Evaluate the dispute, then escalate, accept, or reject

AGENTIFY AND AUTOMATE

An agent evaluates each dispute and applies the rules

Inform VIP customers

Keep the most valuable customers informed

HUMAN IN THE LOOP

The agent prepares the update. A person owns the conversation

Analyze fraud patterns

Look for a broader pattern across disputes

AGENTIFY AND AUTOMATE

An agent watches transactions, merchants, and signals continuously

Dataverse

Dynamics 365 and Power Platform

Demo: Zava credit card disputes

~50 to 65 manual steps → 3 automated steps From days to minutes

assess-rollout-wave-readiness

Unique name ⓘ ⓘ *

cr27f_assess-rollout-wave-readiness

Description *

Always use this skill whenever a user asks whether a rollout wave is ready, can launch, should proceed, is blocked, or needs a go/no-go decision, even when phrased simply such as "Is Wave 2 ready?" Applies Nordic Living's formal launch policy using Sales, rollout, task, store, and Customer Service case data. After explaining the decision, it may record the gate decision and create prescribed remediation actions only with user approval.

Assess Rollout Wave Readiness

Purpose

Apply Nordic Living's launch-governance policy to a rollout wave, explain the record-backed decision, and perform the prescribed cross-app actions only after explicit approval.

Resolve the wave and evidence

1. Resolve the requested Rollout Wave by its name or Wave ID.
2. Retrieve the related Account and Opportunity.
3. Retrieve the wave's launch date, status, readiness percentage, risk severity, approval status, blocker summary, and existing gate-decision fields.
4. Retrieve wave-related Store Location, including critical store and prerequisite status.

Reusable and governed business logic for Copilot and your agents to execute, via Work IQ

Encode your business processes as Skill = Name + Description + Metadata + Business Process Instruction + Resources

Use Power Apps maker portal or Work IQ MCP to author and maintain

Use in Copilot, Copilot Studio, coding agents to execute consistent governed business processes

Scale AI investments that drive greatest impact while improving cost efficiency

Customer Story

TMC Global – Power Apps 911

Your organization **already knows** a
lot more than your **agents** do.

The opportunity is to make that understanding available to agents.

DON'T START WITH

~~"What agent should I build?"~~

Put the business
knowledge you
already have to
work.
